Hardware setup:

The quick start describes the basic settings for the Mobi.Control. The Mobi.Key, Mob.Switch use the same software but with a restrictive option list.

1	SIM card registration	If you have a new unregistered SIM card please register as per the operators instructions and check that the SIM card has credit applied and there is no SIM PIN.
2	Insert SIM card	 <p>The SIM card fits into the slot underneath the Mobi.Control unit. Take care sliding the Sim card into the unit making sure the card is contact side down and the cut corner is to the outside of the casing.</p>
3	Connect power, battery and antenna	<p>Power is connected to terminals 19 & 20 (bottom right of unit) and are not polarity sensitive. A 9-35vDC or 7-27vAC supply may be used. Power is not polarity sensitive.</p> <p>Battery – This is already installed in the Mobi.Control and must be connected. Remove the top lid and connect 3 pin plug on the right hand (K) side as shown below:</p>   <p>Antenna:</p> <p>An external antenna must be connected – please attach a FME connected antenna ensuring that the screw connection is not over tightened (hand tight is sufficient).</p>
4	External wiring	<p>Mobi.Control can accept digital, analog and counter inputs and has two relay outputs.</p> <p>Wiring diagram:</p>  <p>Usage/configuration of this inputs can be found within MobiSuite</p>
5	Check for mobile network connection.	<p>The blue LED on the front will flash to confirm network connection. OFF = check power, ON = No network/SIM incorrect, SLOW = On network, FAST = On network with communication is progress.</p>

My.Mobi web based configuration.

<p>12</p> <p>Mobi devices can be monitored and configured using the My.Mobi website. To start a SMS message is sent to the remote Mobi unit to initialise the remote data connection.</p> <p>Ensure that the unit is powered on and a registered SIM card with credit is installed. Make sure you have the mobil number of the SIM card.</p> <p>Send the following SMS message to the remote Mobi device:</p> <p>0000 apn="your SIM card APN"</p> <p>Remove the quotation marks and add the corresponding APN for the SIM card you are using.</p>	<p>Send a SMS message to the Mobi devices's mobile number</p> <p>Send: 0000 apn=apn,username,password</p> <p>For the network you are using with the Mobi product.</p> <p>Eg: 0000 apn=giffgaff.co.uk,giffgaff,password</p> <p>The Mobi device will respond with a Web-ID number. This may take a few minutes to arrive.</p>  																																																																											
<p>Log onto My.Mobi website</p> <p>Using your internet browser go to:</p> <p>www.webadmin.mobi/en/</p> <p>and enter the Web-ID number and password</p>
